## FUND DESCRIPTION

This very low risk fund invests in cash and short-term deposits, and aims to give a stable and predictable return. While the fund is intended to be very low risk, members should be aware that it could fall in value. The fund is benchmarked against the 3 month Euribid rate, which reflects the rate of interest achievable for institutional investors (such as pension scheme providers) on short-term deposits. It is not guaranteed and can experience negative returns, depending on the prevailing interest rates offered by highly rated counterparty banks, and the Annual Management Charge of the fund.

The fund can be used to protect the value of member's funds against market movements. For members who are close to retirement it is particularly useful for that element of the fund that will be taken as a tax-free lump sum.

**Warning: If you invest in this product you may lose some or all of the money you invest.**

## CUMULATIVE PERFORMANCE

Fund returns are quoted before taxes and after a standard annual management charge of 0.15%. Annual fund management charges are calculated and deducted based on the offer price of the fund. The unit price and value of the fund are always quoted after an allowance has been made for the fund management charge. There is no Bid/Offer spread.

Launch Date (for the series used in the above performance illustration) = 26 Feb 2015; YTD = year to date; p.a. = per annum
